

Who We Are

Doban Architecture is a Brooklyn-based architecture firm with award winning projects in the areas of educational, residential, and economic development. Our multidisciplinary design studio, Think Fabricate provides expertise in furniture, product, graphic, industrial design; design research; and a fabrication shop. Together, we design solutions for better living, learning, and community.

Our common ground is commitment to teamwork, research, and an on-going exploration of function, detail, and character in our work. Our work reflects our enjoyment of color, texture and decorative imagery, all carefully composed. We are proud to bring the human element, genuineness, appreciation of material, and the inclusive spirit that grows from our Brooklyn roots to the process and design of all our projects.

Our three initiatives, **THINK LIVING**, **THINK EDUCATE**, and **THINK MAINSTREETS**, organize our focus in the areas of architecture and products for residential, educational, and community development.
